

SQL DBAs & Developers (SQL Server & BI)

The Artis Group is one of Australia's fastest growing professional services organisations. We take great pride in hiring the very best technical staff, placing them on challenging projects and supporting them with a proven development and mentoring program. Artis Group has an enviable track record in designing and delivering IT solutions and services to blue-chip corporate and government organisations.

We are currently looking out for Technical SQL Database Developers & Consultants with experience in database administration & development across SQL Server. Any experience with business intelligence (BI) solutions like SSIS, SSRS and SSAS, would be well regarded.

Your skills are a blend of understanding business and what makes for delivery of cost effective and productive solutions, as well as knowing how to put the technical solutions together. You will work on things like analysis and problem identification of database and database component performance, solution recommendations, provision of maintenance and optimisation practices and capacity planning.

You demonstrate the following skills & experience:

- Design, development of and/or administration of database management systems and solutions - SQL Server (up to 2008);
- Datawarehousing design and analysis;
- SQL Server Business Intelligence solutions (SSIS, SSRS, SSAS);
- Design and implementation of High Availability Systems;
- Reporting and replication solutions;
- Performance analysis and tuning;
- Migration strategies;
- Strong written and oral communication skills; and
- Proven ability to deliver on client expectations and project outcomes.

We invite you to peruse our website: www.artisgroup.com.au and welcome expressions of interest in this role. To apply, please use the "Apply Now" button below or send your resume to careers@artisgroup.com.au
