

Senior Software Engineer (Microsoft .NET)

- Fast Growing Australian IT Professional Services
- Project & Role Variety
- Permanent & Contract Opportunities Avail

ARTIS GROUP is one of Australia's fastest growing professional services organisations, providing technology solutions to the enterprise market to help our clients achieve success. In so doing, we take great pride in hiring the very best technical staff, placing them on challenging projects and providing the right support and tools to help achieve individual success.

Artis has exciting consulting and software development project opportunities at present, for an **experienced Senior Software Engineer across Microsoft .NET & related Microsoft stack - incl. Windows applications, web development and SQL - with a strong background in design and coding.**

You will have the opportunity to be exposed to leading edge technologies and the latest software development practices, as well as continue to work on more traditional platforms. From smaller web portal projects through to creation of bespoke applications that require complex integration and interfaces. The role of an Artis Senior Software Engineer is *multi-dimensional* one. Variety is on offer, both technically & professionally!

You are able to exercise technical and administrative leadership in project work, timely production of quality deliverables, take responsibility for quality of deliverables, and support and mentor other developers if required. You will also provide input to solution design and architecting, scoping of projects and time/ cost estimates, proposal writing and presenting, from time to time.

You will have:

- At least 8 - 10 years of experience in development and support of Microsoft applications, web development and SQL Server databases;
- Hands on- programming and .Net application development - solid skills in: C# & .NET 3.5 & 4.0 ASP.NET, WinForms, WebForms, Mobile, VS2005, WCF, automated testing and version/configuration management in TFS, Visual SourceSafe (or other equiv.) and code generation tools (e.g.: .Net tiers);
- Deep understanding of OO concepts and implementations in .NET;
- Any experience in SharePoint, Biztalk, CRM Dynamics will be well regarded;
- Ability to work competently across the full development lifecycle, from gathering requirements if required, through to hands on coding, testing and continued application support;
- A university degree or equivalent qualification in Computer Science;
- Relevant (& ideally current) Microsoft certifications;
- Some large enterprise/ complex applications environment experience ideal;
- Very strong communication skills - verbal ,written and interpersonal;
- A great team attitude & spirit, passion for what you do and a willingness to 'do what it takes';
- Excellent time management and organisational skills; and
- An awareness of commercial context.

If you think you have what it takes and would like to come on board at Artis, please use the **APPLY NOW** button or send your details and resume to: careers@artisgroup.com.au.
